Work easy. Play hard.  Windows

Viglen Omnino 5 with Vig710W motherboard

This month sees the first appearance of the Vig710W and Vig820S motherboards in our acclaimed Omnino 5 all-in-one range, and reinforces the range with the latest Intel 4th Generation Core processors.

Vig710W features a great all-round spec with integrated Intel HD4600 graphics, HD audio and gigabit Ethernet, while Vig820S adds support for Intel vPro technology, combining all-in-one convenience with cutting edge manageability. Both boards support a terrific range of features for single desk and shared area computing, underpinning Viglen as your first choice for desktop computing excellence.

Find out what Windows 8.1 Pro can do for your organisation. Visit www.viglen.co.uk/windows8 today.

In January 2014, Viglen was acquired by XMA parent company Westcoast Holdings. XMA and Viglen combined on 1st April 2015 creating one of the largest IT solution providers in the UK. The new company offers our combined customer base improved service and a new challenger to the traditional UK IT channel.

Welcome to the April edition of the Price List and we're pleased to present a great selection of our latest products to meet your IT requirements. Our cover model this month has been continued for the reason that it's genuine performance, versatility and manageability makes it simple to deploy. But we haven't neglected our existing line-up; also featured in this price list. XMA's team of experienced sales staff and engineers can help you decide what to buy, and when to buy it. Your account manager will help you make the most of existing and new products, so you can be sure that when it comes to deciding on your IT spend.

Viglen Omnino 5

viglen omnino

With a striking design that looks as good as its performance, the Omnino 5 combines a space-saving footprint with a high level of integration to produce a truly versatile all-in-one PC. The choice of 21.5" or 23" displays and built-in webcam is complimented by Intel® Core™ processors with a choice of motherboards supporting multiple configuration options for increased flexibility.

Choose the Omnino 5 with Viglen Vig710W featuring Intel H81 chipset motherboard for all-round performance or the Omnino 5 with Viglen Vig820S motherboard for Intel® vPro™ manageability.

Intel® Core™ i3 Processor i3-4170T 3.20GHz,

Viglen Omnino 4

viglen omnino

The Omnino 4 is Viglen's fourth generation of all-in one computer. The result is a truly versatile computer system with the flexibility to achieve a wide range of deployments and budgets. Its height-adjustable VESA mounting is ideal for TFT displays from 15" up to 22" and the microATX form factor puts you in control of the specification.

For organisations with a managed network, Windows 8.1 Pro improves productivity both inside and outside of the office, helps protect critical data and connects in any networking environment.

Viglen Integra

viglen integra

The Integra is a flexible all-in-one PC with a compact footprint that belies its capabilities. With a footprint no bigger than a flat-screen monitor, the Integra allows for versatile deployment with its innovative, integrated design. Well suited to classroom, shared access and office installation, the Integra features a height adjustable monitor stand, chassis security and easily accessible ports as standard.

Choose the Integra with a Viglen Vig700S motherboard for compatibility with Intel® Core™ i3 Processors for versatile deployment.

viglen Genie Pro

Viglen's Genie Pro range of workstations is designed for power users everywhere. Ideal for a wide range of tasks including data modelling, video editing, professional graphics and digital content creation, both models offer a highly configurable, performance-oriented workstation.

Choose the **Genie Pro**, harnessing the power of Intel® Xeon® E5 1600 series processors with the Intel® C602 chipset and quad channel DDR3 memory for extreme single processor performance.

Choose the **Genie Pro²** to take workstation computing to the next level with a choice of single or dual processor Intel® Xeon® E5 2400 series processors, Intel® C602 chipset and triple channel registered 1600MHz DDR3 memory.

XMA recommends Windows.

Work easy. Play hard.  Windows
